## More About Number Sentences

Sometimes there is a problem to solve on each side of the sign in a number sentence.

$$\begin{array}{ccc} \boxed{9} & & \boxed{10} \\ 6 + 3 & \boxed{<} & 4 + 6 \end{array}$$

*Think! Six plus three equals nine.* Write a 9 in the box above  $6+3$ .

*Four plus six equals ten.* Write a 10 in the box above  $4+6$ .

Is 9 less than 10, greater than 10, or equal to 10? Nine is less than 10. Write the *less than* sign.

2. In Bible times, if someone stole a sheep, he had to give back more than the number he took. Benjamin's father had 35 sheep, but someone stole one sheep. The thief was caught and had to give back 5 sheep. How many sheep did Benjamin's father have then?

39 sheep

Solution

Subtract the sheep that was stolen.

Add the number of sheep returned.
